Health & Luxury*

*DreamLine Classic Cedar saunas deliver total relaxation and comfort in easy-to-assemble kits. Premium Western Red Cedar wood and traditions of fine craftsmanship come together to produce DreamLine Classic saunas. We take great pride in the design and construction, as well as visual beauty of our sauna rooms.*

### Creating your perfect sauna

Select from 10 sizes, choose from our varied layouts, include a DreamLine all glass or wood and glass door and let us know if a window option is required. In addition to the standard sauna designs, DreamLine Classic Cedar saunas are also available in two other options: Portable and Outdoor.

The Portable Sauna is ideal for one or two people and is fully equipped with space-saving heater. Simply snap it together in a matter of minutes, move it into place on factory installed casters and plug into a standard 110V/15 amp outlet.

Outdoor Saunas include panelized roof package, special wiring and added insulation. Outdoor saunas are perfect in your backyard or by the pool.

Our pre-built modular saunas fit together easily and provide greater flexibility so you have an option of taking your sauna with you when you want to relocate. Interior surfaces are Western Red Cedar. Luan Mahogany paneling is used on exterior, but Cedar can be ordered as an option on any of the exterior panel sides. Pre-built modular sauna assembly times vary by room size and shape, and can take as little as 3-4 hours.

Clear Western Red Cedar is a popular wood in Canada and America for sauna construction. With a distinct aroma and variations of dark and light brown colors, cedar is used for both residential and commercial sauna projects. Western Red Cedar contains oils that act as a natural preservative to help Cedar resist decay, making it also the natural choice for outdoor sauna construction.

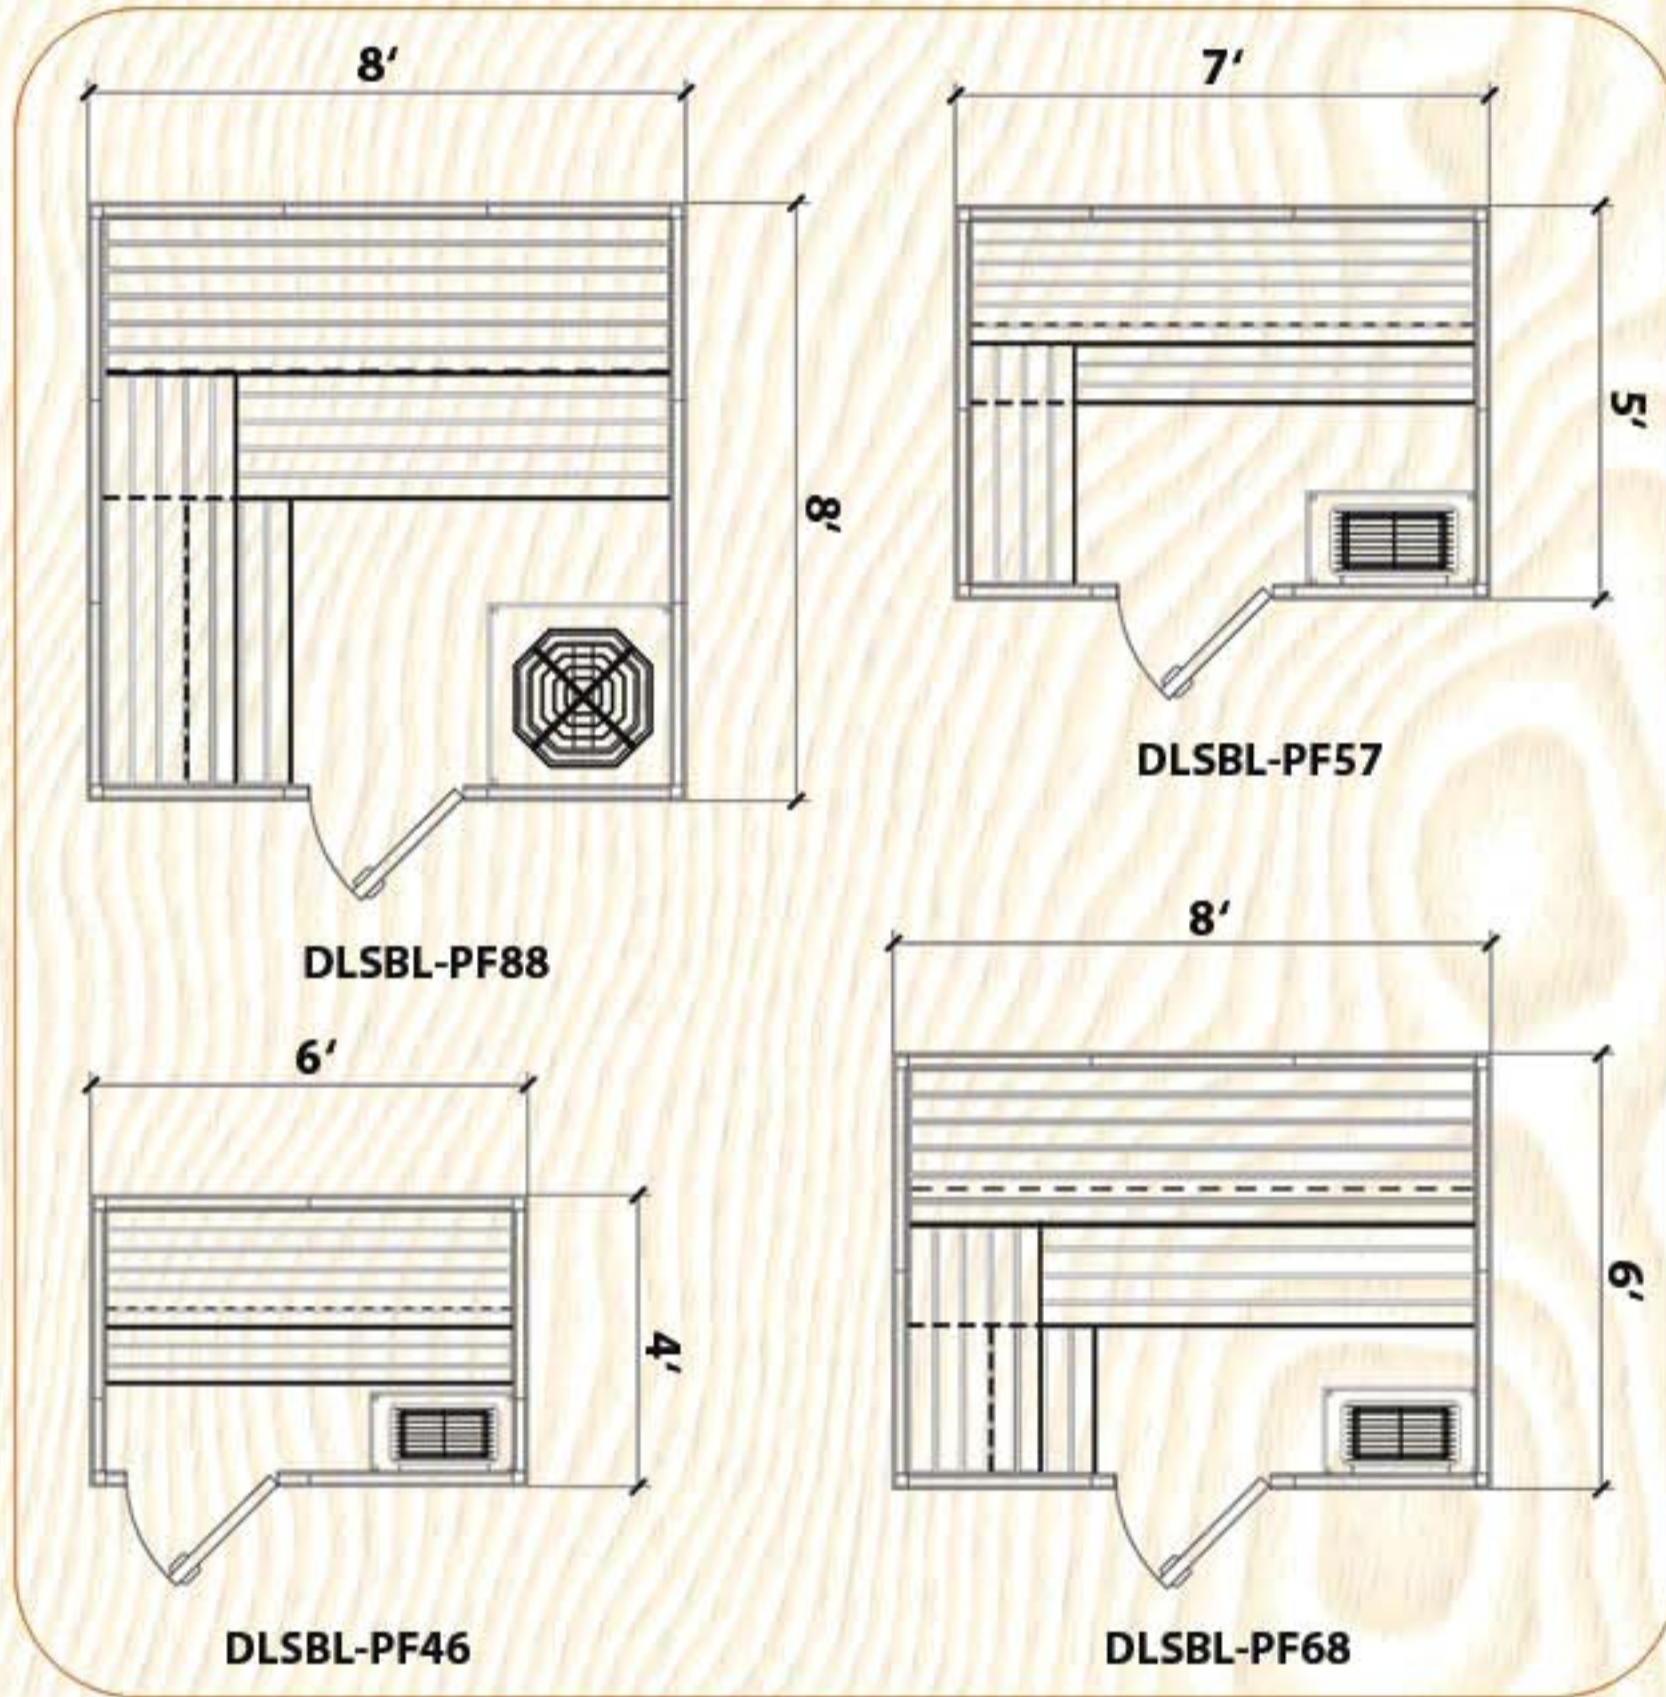

Whether you are new to the sauna tradition or have been a sauna enthusiast for years – DreamLine brings you the ultimate sauna experience.
